

Server-based digital video system.

The versatile VisionHawk™ is a server-based, digital video recording system that gathers, transfers, stores and retrieves evidence. No other system provides law enforcement and court officials with better control or easier, faster management of critical evidence.

VisionHawk™ Storage Server (VSS)

The VSS is an integrated solution that provides easy access to captured video evidence. It is much more than a server. It is an equipment rack that houses Network Equipment, an Uninterruptible Power Supply, RAID Storage Solutions and a Control Server.

When a patrol vehicle uploads its video to the VSS, an automated script logs the video in and catalogs it for swift and easy retrieval. The video is stored on state-of-the-art fault-tolerant RAID 5 servers built with industry standard and tested parts. The VSS viewer can be installed on any computer that has network access to the server.

The VSS Application is licensed per department and includes technical support, and free updates.

Dell®, Intel®, Microsoft®, Maxtor®, Netgear®, Akiwa®, 3 Ware®, and Asus® are just a few of the brand names used in building these advanced server systems.

All components are selected based on their performance and industry-wide reviews. Each server is built, tested and burned-in for a minimum of 72 hours.

The system ships to you pre-configured for installation.

Server Hardware Specifications

(July 2003) Each unit can hold up to 6TB of storage and these can be linked together to build as large of a system as needed.

- 2.5 GHz Pentium® 4 Processor
- 1 GB DDR System Memory
- RAID 5 or RAID 6
- Dual Redundant Hot Swappable Power Supplies
- Hot Swappable Hard Drives
- Gigabit Ethernet
- Microsoft® Server Software Workstation
- DVD/CD-RW Writing Drive
- NTSC Video Out For Dubbing To VHS Tape
- 17" Flat Panel Monitor
- Speakers
- Keyboard, Optical Wheel Mouse
- Microsoft® Windows® XP Professional

VisionHawk™
DIGITAL VIDEO EVIDENCE SYSTEM

**Digital
vision.**SM

From curb to courtroom. State-of-the-art video evidence systems by 

GSA CONTRACTOR

International Police Technologies, Inc.

manufactures in-car video recording systems.

A law enforcement officer who saw the need to pursue and collect evidence with unique and

versatile systems founded IPT in 1994. The

company is known for its portable PowerCam X™

and Investigator™ video recording systems that

collect evidence inside and outside the car.

And now the innovative VisionHawk™ expands

the tools IPT makes available to agencies

building their evidence collection arsenal.

IPT products are crucial to law enforcement,

security and corrections agencies across the

United States, in Canada and in several foreign

countries. All systems are engineered and

positioned to eliminate airbag interference, to be

viewed safely and to minimize the effects of heat,

shock and vibration. The rugged TR/9™ audio

transmitter is included with all systems. Every

system is backed by a solid warranty and our

record for reasonably priced, responsive service.

For instance, VisionHawk™ is supported with

software updates for the life of the system.

You be the judge. IPT systems will substantially

reduce your departmental liability suits, insurance

costs and citizen complaints. And they will serve

you well as excellent prosecution and evidence-

gathering devices.
